

Smart Contracts and Decentralized Finance

References and their Use

Kai Frehner, Benjamin Gerber

21. November 2025

Apart from the references declared in the short paper a mixture of AI-Tools was used. The architecture, implementation and comments in the smart contract code stem from Kai. For minor Code debugging the REMIX AI Assistant was employed.

The statistical analysis was done using R. Minor code debugging was done using Chat GPT.

All thoughts expressed in the short paper stem from the Kai and Benjamin. Chat GPT was used to fix spelling errors as well as improve clarity and readability of the paper.
